## Importance of Exports for Selected U.S. Horticultural Products

Source: U.S. Bureau of the Census

**Note:** Percentage of production exported is defined as the volume of exports divided by the volume of production for fresh use. The volume of production going to processing is not considered in the equation. Export and for fresh use production estimates represent the averaged of exports and for fresh use production during marketing years 1999/00-2001/02.

## Third edition of the 2003 *FAS Quarterly Reference Guide to World Horticultural Trade: Trade Data Edition*.

The *FAS Quarterly Reference Guide to World Horticultural Trade* will comprise the following four issues:

1. Production, Supply, and Distribution Edition (January 15, 2003). This publication will include 5 years of Production, Supply, and Distribution Data for over 30 products. Additional information is available on the Web at: <http://www.fas.usda.gov/psd/>
2. Charts Edition: illustrating major trade trends, country features, and commodity features (July 2003)
3. Trade Data Edition (July 2003)
4. Trade Policy Edition (October 2003)

The analytical articles formerly published in *World Horticultural Trade and U.S. Export Opportunities* are now updated on the Horticultural and Tropical Products Division Homepage at: <http://www.fas.usda.gov/http/>. The HTP Homepage is updated weekly with the latest information on policy and technical developments affecting trade in horticultural commodities. For further information on this site, please contact Nancy Hirschhorn at (202) 720-2974.

Visit the Horticultural and Tropical Products (HTP) Division Homepage!

## **Explanatory Notes on the Trade Data Edition:**

The U.S. trade data presented in this report are available at: <http://www.fas.usda.gov/ustrade>. The U.S. Trade Internet System, located at this web link, supports the tracking of imports and exports of agricultural commodities into and out of the United States. The system allows users to generate reports that provide trade information on one or more commodity(ies) for one or more country(ies) over a user-specified time period.

The U.S. Department of Agriculture defines horticultural products to include: fresh and processed fruits, vegetables, and tree nuts; juices; wine and wine products; hops; nursery products and cut flowers; ginseng; essential oils; beer; and other miscellaneous horticultural products. For a complete listing of the products included under the definition of horticultural products, including the HS codes, please refer to the “Horticultural Exports” and “Horticultural Imports” tables located on pages 7 to 31 and <http://www.fas.usda.gov/ustrade>. For further information on the U.S. Harmonized Tariff System, go to <http://dataweb.usitc.gov>.

Please be advised that the 2002 export and import 13th month data has been applied. Each year the Department of Commerce, U.S. Census Bureau, Foreign Trade Division releases a 13th month file approximately three (3) months after the December release of the data. The 13th Month file includes corrections (ERRATA) made at the request of outside sources and verified with exporters or importers by the Foreign Trade Division. The 13th month data also includes late shipments. Late shipments are Shippers Export Declarations or Import Entry Summary Forms that are received too late to be included within the normal monthly trade release.

The global trade data presented in this report were generated using a database provided by Global Trade Information Services, Inc. This database covers official country trade statistics for 44 countries, which account for over 90 percent of world trade in horticultural products. In the global trade tables of this publication, all 15 European Union (EU) countries were grouped into one category for the purpose of excluding intra-EU trade. In addition, hyphens (-) represent missing data. For a complete listing of countries covered by the database, see the “Global Exports” and “Global Imports” tables on pages 46 to 51. Information on trade by all countries, including those not captured in the Global Trade database system, is available from the Food and Agriculture Organization (FAO) of the United Nations at: <http://apps.fao.org>.

### **Trade Mission to Brazil (September 2003)**

Are you a U.S. exporter of consumer-ready foods, organic products, or a distributor of trading company interested in selling products to the retail sector in South America's most populous nation? Brazil imported \$60 million in consumer-ready products from the U.S. in 2002. This USDA/FAS-sponsored trade mission to Sao Paulo will meet top importers and supermarket buyers, go on guided site tours of supermarkets and other retail sites, listen to briefings by the supermarket association, exhibit your products at the USDA/FAS booth at SIAL Mercosul/ABRAS, and have an opportunity to promote products at a reception with qualified buyers hosted by the American Consul General. Contact: Shani Zebooker at 202-720-2075 or e-mail: [Shani.Zebooker@usda.gov](mailto:Shani.Zebooker@usda.gov).

### **Alimentaria 2004 (Barcelona, March 8-12, 2004)**

We invite you to exhibit your products under the USA Pavilion at Alimentaria in Barcelona, Spain, March 8-12, 2004. Alimentaria, a biennial event, is the largest food and beverage exposition in the Iberian Peninsula. In 2002, Alimentaria received more than 3,000 exhibitors occupying 82,000 net square meters of floor space, with 141,000 professional visitors from 80 countries. During this 5-day event, Alimentaria offers you the possibility of marketing your products in one of the fastest growing markets in Europe for high-value products, fueled by the growing Spanish tourism industry. Consider exhibiting at this USDA-endorsed event! Contact: Sharon Cook at 202-720-3425 or e-mail: [Sharon.Cook@usda.gov](mailto:Sharon.Cook@usda.gov).
